

Cypress Project Management

In today's complex business environment, a key to success is the ability to manage projects efficiently, effectively, and with minimal surprises.

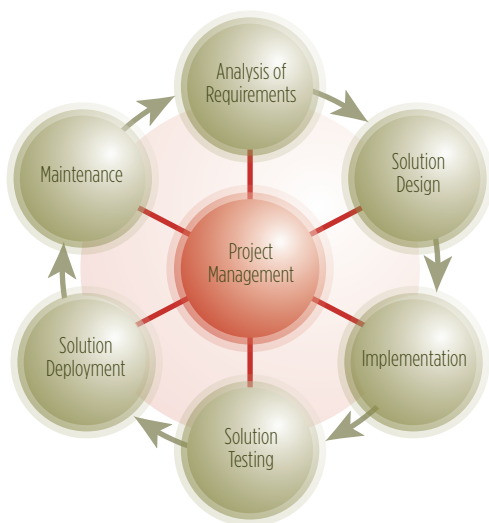

Cypress successfully takes projects from initiation to completion using strong skills and experience in proven methodologies that deliver solutions to meet the business and technology needs of our clients. Our success in delivering robust solutions relies on our skills in working with clients as business partners and in managing complex engagements.

Project Management Expertise:

With expertise in development, design, business process analysis and documentation, many Cypress Project Managers have completed Project Management Institute accreditation and hold Project Management Professional certifications. Our Project Management team has helped customers implement Data Warehouses, ERP Systems, Business Intelligence and Financial Reporting systems, Websites and Web applications, and SharePoint portals. Whether you need a team of experts to design and execute a project or a role player to provide interim support to keep your projects on schedule and within budget, you can rely on our best-in-class professionals.

Cypress Methodology

Cypress' proven methodology ensures that the goals of client are met.

Cypress uses a systematic approach and methodology.

Backed by years of experience, our team works closely with your organization to create project plans that are clear, defined and executable. While maintaining the cohesiveness of the project process, a Cypress Project Manager gathers and organizes information and develops a requirements matrix; creates and manages the project schedule and milestones; maintains meeting minutes, status reports and current information on the health and status of the project; and works as a liaison between the Cypress team and yours to ensure the goals of client and project are attained.

Our Clients: At Cypress, we work with companies looking for tangible benefits that reach their bottom line. We have had the opportunity to work with some terrific large organizations, including: Microsoft, Starbucks and Blue Nile; and fantastic mid-market customers including Hosting.com, Wavelink, Microvision and Art Wolfe, Inc.
